

# Applications

## Reliable

Providing immediate, simple and very effective stabilisation, Duckbill mechanical ground anchors have wide ranging applications for both temporary and permanent works and have proved themselves to be reliable under virtually all displaceable ground conditions.

## Cost-effective

With rapid installation, they are both efficient and cost-effective and have been successfully employed around the world for stabilising structures, securing temporary works, erosion control and underwater projects

## Versatile

Duckbill anchors can be supplied in anodised aluminium, galvanised cast iron and complete stainless steel assemblies. They are available in a range of sizes and offer a choice of termination plates, including a fully concealed top termination with the Combi-Tec system, making them ideal for historic or listed structures.

## Structural Stabilisation Erosion Control Temporary Structures Underwater Fixtures

- ◆ Sheet piles
- ◆ Retaining walls
- ◆ Bridge abutments
- ◆ Lock and canal walls
- ◆ Tunnel linings
- ◆ Gabion baskets
- ◆ Revetment matting

- ◆ Coastal defences
- ◆ Cliff stabilisation
- ◆ Overhead gantries
- ◆ Geotextiles and bio rolls
- ◆ Highway and railway embankments
- ◆ Scaffolding
- ◆ Guyed structures and masts
- ◆ Temporary re-locatable structures
- ◆ Pipelines and buoys
- ◆ Seabed matting
- ◆ Floating docks

- ◆ Tree kits
- ◆ Ski mats
- ◆ Security chains and locks
- ◆ Covered tennis courts
